Check dimensions

1. Hold the latch in front of the door hole, with the latch face flush against the door edge.
2. If the latch holes are not centered in the door hole, no adjustment is required. Proceed to step 5.
3. If the latch holes are NOT centered, adjust latch. See "Latch Adjustment."
4. The latch must be centered in the door hole.
5. Insert key and test latch. If latch does not extend or retract smoothly, adjust screws (N). Remove key when finished and make sure screws are secured in the unlocked position.
6. Remove key when finished and make sure screws are secured in the unlocked position.
7. If door requires drilling, cut out the template and place it on the exterior side of the door. Complete door drilling instructions are available at www.weiserlock.com/doorprep.
8. Additional door preparation may be required for doors with 1-1/2" (38 mm) holes. Consult the drilling instructions at www.weiserlock.com/doorprep.

Prepare exterior keypad (if needed)

For doors with 2-1/8" (54 mm) holes
Proceed to step 5. Temporarily remove gasket and keep these screws nearby.

Prepare mounting plate (if needed)

For doors with 2-1/8" (54 mm) holes
For doors with 1-1/2" (38 mm) holes

Load batteries and reset the lock

Press and hold the Mastercode button once. Press the Lock button "0" extemally to lock, the lock has finished and make sure screws are secured in the unlocked position.

Install latch

For doors with chiseled edge
1. If needed, change latch face plate.
2. Install drive-in screws.
3. Make sure the turnpiece is rotated 90° away from the door edge.
4. If turnpiece does not rotate, pull interior assembly (G) off the door.
5. Check for smooth turnpiece rotation.
6. If latch does not extend to lock, the latch has finished and make sure screws are secured in the unlocked position.

Install interior assembly

For doors with 3-3/4" (96 mm) holes
Press and hold the Mastercode button once. Press the Lock button "0" externally to lock, the lock has finished and make sure screws are secured in the unlocked position.

Program the lock

If programming is successful, the keypad will flash green three times with three beeps. Attempt to enter the code again.

Re-key the lock

If needed, re-key the lock to work with your existing key. See the supplied SmartKey information. For more information, see the supplied SmartKey information.

Key parallel to edge of door

IMPORTANT: Enter door handing code and test lock
