Prepare the door and check dimensions

If drilling a new door, use the supplied template and the complete door drilling instructions available at www.weiserlock.com/doorprep.

1. Measure to confirm that the hole in the door is either 2-1/8" (54 mm) or 1-1/2" (38 mm).
2. Measure to confirm that the backset is either 2-3/8" or 2-3/4" (60 or 70 mm).
3. Measure to confirm that the hole in the door edge is 1" (25 mm).
4. Measure to confirm that the door is between 1-3/8" and 2" (35 mm and 51 mm) thick.

Install the latch and strike

1. Is the door edge chiseled?
2. Use latch "A". If the latch bolt is not already extended, extend the latch bolt as shown.
3. Hold the latch in front of the door hole, with the latch face flush against the door edge.
4. Which latch are you installing?
5. Install strike on the door frame.

Note: Additional door preparation may be required for doors with 1-1/2" (38 mm) holes. Consult the deadbolt drilling instructions at www.weiserlock.com/doorprep.
3 Install the exterior touchscreen

A What is the diameter of the hole in the door?

Diameter is 2-1/8” (54 mm) or Diameter is 1-1/2” (38 mm)

“D” is required for installation. Install “D” on “F”.

“D” is not needed for installation. Discard “D”.

B Locate screws for step 3C and keep them within reach.

C Install exterior touchscreen and mounting plate.

D "D" is required for installation. Install "D" on "F".

E "D" is not needed for installation. Discard "D".

4 Install the interior assembly

A Remove battery cover and battery pack from interior assembly.

B Install interior assembly onto mounting plate.

5 Install the batteries and perform the door handing process

This step will teach your lock the orientation of your door and is crucial to lock operation.

A Install 4 AA batteries in battery pack.

B Make sure the door is open, and insert the battery pack.

C After a few seconds, the latch bolt will retract and extend on its own to learn the orientation of the door. This is called the door handing process, and it is crucial to lock operation.

D If the touchscreen indicates a failure, attempt this procedure again.

If the door handing process is still unsuccessful after a second attempt, consult the Programming and Troubleshooting Guide on the SmartCode 10 Touchscreen page at www.weiserlock.com.
6 Add user codes

Programming Timeout
During programming, if the screen is not pressed for 20 seconds, the system will time out (indicated by three beeps and the “X” pattern flashing three times), and you will need to restart the procedure.

A. Make sure the door is open. Press the Program button once.
B. Press checkmark symbol once.
C. Enter user code. A total of 16 user codes may be programmed.
D. Press lock symbol once.
E. Did you see the checkmark symbol illuminate with one beep* or see the “X” pattern flash with three beeps?*

Option 1
Touch screen with palm or back of hand until digits illuminate.

Option 2
Touch lower left area of screen (where checkmark is located) until digits illuminate.

Option 3
Touch screen with three or more fingers until digits illuminate.

Checkmark symbol with one beep
Programming was successful

“X” pattern with three beeps
Programming was unsuccessful

*Beeping sound will only be heard if switch #3 (on the lock interior) is in the on position. See “Switches and Status LED Colors” on page 4.

Mastercode
For enhanced security, a mastercode may be used when adding and deleting user codes. For more information about the mastercode, download the Programming and Troubleshooting Guide on the SmartCode 10 Touchscreen page at www.weiserlock.com.

7 Test the lock (review normal operation)
Confirm that the code(s) added in step 6 can unlock the door.

Activating the Screen
Option 1
Touch screen with palm or back of hand until digits illuminate.

Option 2
Touch lower left area of screen (where checkmark is located) until digits illuminate.

Option 3
Touch screen with three or more fingers until digits illuminate.

Locking the Door
1. Activate the screen.
2. Press lock symbol.
Note: If no user codes are programmed, the door cannot be locked via touchscreen.

Unlocking the Door
1. Activate the screen.
2. If SecureScreen™ is enabled, touch the random digits that appear.
3. Enter user code.

SecureScreen™
SecureScreen is an added-security feature that displays random digits before you enter a user code to unlock the door. This feature ensures that there are fingerprints on all digits so that codes cannot be identified by examining the touchscreen for fingerprints.

If desired, this feature can be disabled by turning switch #4 to the off position. See “Switches” on page 4.

If you press the wrong digit while entering a user code, you can press the lock symbol once to clear the digits entered previously and immediately restart the code entry process.

Each user code must be a unique code between 4 and 8 digits.

If desired, this feature can be disabled by turning switch #4 to the off position. See “Switches” on page 4.

8 Re-key the lock (if needed) and install the battery cover

A. Re-key the lock (if needed).
B. Install the battery cover.

IMPORTANT: Remove battery pack before re-keying.

Re-key the lock to work with your existing key. See the supplied SmartKey Re-key instructions for more information.

Reinstall battery pack.

Keep “J” in a safe place, as you will need it to access the back panel for additional programming.
**System Alerts**

<table>
<thead>
<tr>
<th>Display</th>
<th>Alert</th>
<th>Reason</th>
<th>Solution</th>
</tr>
</thead>
<tbody>
<tr>
<td><em>X</em> pattern flashes one time with one beep</td>
<td>One incorrect code entered</td>
<td>Re-enter code.</td>
<td></td>
</tr>
<tr>
<td><em>X</em> pattern flashes three times with three beeps</td>
<td>No user code programmed</td>
<td>Program at least one user code.</td>
<td></td>
</tr>
<tr>
<td>Low battery</td>
<td>Programming timeout after 20 seconds</td>
<td>Attempt programming procedure again.</td>
<td></td>
</tr>
<tr>
<td>Unsuccessful programming</td>
<td>Door jammed while attempting to lock</td>
<td>Manually re-lock door. If needed, repeat process.</td>
<td></td>
</tr>
</tbody>
</table>

**Manual Door Handling**

If needed, the door handing process can be initiated manually. This is useful if the lock is being moved to a different door.

1. **Remove battery pack.**
2. Press and HOLD the Program button while reinserting the battery pack. Release button once battery pack is installed. The status LED will flash red and green.
3. **Press the Program button once more.**
4. The latch bolt will unlock and retract to learn the orientation of the door.

**Factory Reset**

A factory reset will delete all codes associated with the lock.

1. **Remove battery pack.**
2. Press and HOLD the Program button while reinserting the battery pack. Keep holding the button for 30 seconds until the lock beeps and the status LED flashes red.
3. **Press the Program button once more.** The status LED will flash green and red several times.
4. After a few seconds, the lock will initiate the door handing process, and the latch bolt will extend and retract to learn the orientation of the door.

**SmartCode at a Glance**

Exterior

- Touchscreen
- Checkmark symbol
- SmartKey toolhole

Interior (cover removed)

- Back panel
- Program button
- Lock symbol
- Status LED
- Switches
- Turnpiece shaft

Note: When the cover is removed, the turnpiece shaft can be used to manually lock and unlock the door.

**Switches and Status LED Colors**

<table>

</tbody>
</table>

**Deleting a single user code**

2. Press Checkmark symbol once.
3. Press Lock symbol once.
4. Enter user code to be deleted.
5. Press Lock symbol once.
6. Re-enter user code.
7. Press Lock symbol once.

If unsuccessful, make sure to enter the same valid code in steps 4 and 6.

**Factory Reset**

1. Remove battery pack.
2. Press and HOLD the Program button while reinserting the battery pack. Keep holding the button for 30 seconds until the lock beeps and the status LED flashes red.
3. Press the Program button once more. The status LED will flash green and red several times.
4. After a few seconds, the lock will initiate the door handing process, and the latch bolt will extend and retract to learn the orientation of the door.

**Important Safeguards**

1. Read all instructions in their entirety.
2. Familiarize yourself with all warning and caution statements.
3. Remind all family members of safety precautions.
4. Protect your user codes and mastercode.
5. Dispose of used batteries according to local laws and regulations.

**CAUTION:** Prevent unauthorized entry. Since anyone with access to the back panel can change the user codes, you must restrict access to the back panel and routinely check the user codes to ensure that they have not been altered without your knowledge. The use of a mastercode can help protect your system’s settings.

**WARNING:** This Manufacturer advises that no lock can provide complete security by itself. This lock may be defeated by forcible or technical means, or evaded by entry elsewhere on the property. No lock can substitute for caution, awareness of your environment, and common sense. Builder’s hardware is available in multiple performance grades to suit the application. In order to enhance security and reduce risk, you should consult a qualified locksmith or other security professional.
