**1 Check dimensions**

See note below*

*If you are installing this lever below an existing lock or you plan to install a lock above this lever, make sure that the distance between holes is at least 5-1/8” (125 mm).

**2 Adjust the backset of latch (if needed)**

Hold the latch in front of the door hole, with the latch face flush against the door edge.

If the latch holes are centered in the door hole, no adjustment is required. Proceed to step 3.

If the latch holes are NOT centered, adjust latch. See “Latch Adjustment.”

**3 Adjust latch face (if needed)**

For doors with chiseled edge (square corners)

Proceed to step 4.

For doors without chiseled edge (rounded corners)

door hole, with the latch face flush against the door edge. If the latch holes are centered in the door hole, no adjustment is required. Proceed to step 3.

If the latch holes are NOT centered, adjust latch. See “Latch Adjustment.”

**4 Install latch**

Correctly orient latch

Correctly orient latch

**5 Install keypad and mounting plate**

Cable goes over latch

Keep parallel to edge of door

Tighten screws evenly

**6 Install spindle**

**7 Disassemble interior assembly and load battery pack**

**8 Install interior assembly**

**9 Install levers**

**10 Install strike**

Close the door and fasten lever operations. If latch is latched in the strike, adjust strike tang.

**11 Program the lock**

Programming instructions are located on this page.

**12 Install battery cover and re-key the lock**

Keep "Q" in a safe place, as you will need to access the back panel for additional programming.

If needed, re-key the lock to work with your existing key. See the supplied SmartKey Re-key Instructions for more information.

**Template**

If your door requires drilling, cut out the template and place it on the exterior side of the door. Complete door drilling instructions are available on the SmartCode lever page of www.weiserlock.com.
**User Guide**

**User Codes Requirements**
Each user code shall be a unique number between 0 and 8 digits. A total of 8 user codes may be programmed.

**How the Keypad Works**
Each button represents two numbers (i.e. 1 and 2 for the first button). You only need to push the button once to get either 1 or 2. For example: If your code is 1-2-5-6-8, you only need to push the button five times: 1 2 3 4 5.

**Programming Behavior**

**Successful Programming**
The keypad will flash green once, and you will hear one beep*.

**Unsuccessful Programming**
If no button is pressed for five seconds, the system will time out, and you will need to restart the procedure.

**User Codes Can Be Programmed With or Without a Mastercode**
Using a mastercode is an optional, added-security measure. User codes can be programmed with or without a mastercode. It is not enabled by default. A mastercode is used to add and delete user codes, but it cannot unlock the door (unless the same code is programmed as a user code, though this is not recommended). The mastercode must be 4-8 digits.

**SmartCode at a Glance**

**Normal Operation**

**Unlocking the Door**
Press Lock button once.

**Locking the Door**
Press Lock button again.

**Encrypted Codes**
If user codes are programmed, the lock button will be disabled.

**Incredible Codes**

**Adding User Code(s)**

**Adding a Mastercode (Optional for Enhanced Security)**
A mastercode is enabled: 1. Press Program button once. 2. Enter new mastercode. 3. Press Lock button again. 4. Enter the number of codes that corresponds to the user codes you are adding. 5. Press Lock button again.

**Adding User Code(s)**

**Normal Operation**

**Unlocking the Door**
Press Lock button once. (If your code is programmed, you will see the keypad light up the keypad at night.)

**Locking the Door**
Press Lock button once.

**Deleting User Codes**
In order to delete a user code, you must enter the code by adding a different user code in the same position. For example, if you want to delete the first code, add a different user code in position 1.

**Testing Code** While the door is open, test the user code to light up the keypad at night.

**Switches, Status LED Colors and Keypad Warnings**

**Battery Replacement**
If a deadbolt is installed above the lock, remove battery once every 15 months.

**Factory Reset**

**Emergency**

**Important Safeguards**

**Regulatory Compliance**

**Disclaimer**
The content complies with standard established by the following regulatory bodies:
- FCC: Federal Communications Commission (U.S.)
- IC: Industry Canada

**Battery Disposal**
Do not dispose of batteries in your household trash. Call your local recycling center or your local recycling agency. These batteries may be recyclable.
